Claude Nelson - a lighted fountain in the new ecology pond on the northeast side of the Porterville College campus will be in operation each day from 4 p.m. to 10 p.m., with lights on from 8 p.m. to 10 p.m. The ecology pond and fountain resulted from efforts of the Porterville College Patrons' association and the Southern Tulare County Sportsmen's

WHAT IS IT?

ALTHOUGH HE has found many types of Indian artifact on his ranch southwest of Porterville along the Tule river, Ray Longley, in above photo, has no idea what the shaped and carved sandstone object is that he picked up last week, however, he does plan to contact authorities on Indian artifact in an effort to identify it. Apparently the present Longley ranch is on the site of an old Indian camp - possibly a camp site that even pre-dates the Indians. (Farm Tribune photo)

A RECORD

THIRTY-NINE oranges are on this limb from a Valencia tree on the Domer Power home place northeast of Strathmore. Power, shown in above photo, says that trees often produce a "cluster" of fruit but that 39 oranges on a single limb sets a record.

HEROES THEY'RE NOT

The James brothers made it. Bonnie and Clyde made it. Billy the Kid made it. All of them killers and criminals. All of them, and many others, sanctified as folk heroes in the rather strange and childish way we Americans have of transmogrifying slobs into saints, if only they are picturesque enough.

Now the SLA sextet slain in the ultimate and inevitable confrontation with the law in Los Angeles is being anointed and prepared for beatification, at least. The litany is: they were idealists, they were misunderstood, they died nobly against insuperable and malicious odds in order to awaken us to their holy message.

(Expletive deleted)

The members of the SLA were well-fed, well-educated offspring of the establishment who came to Berkeley, adopted an escaped convict as their token black leader, and were inculcated with the fervor of violence in the name of salvation; terror and murder as the eleventh commandment. Their idealism was to shoot a black superintendent of schools in the back, and boast about it. To rob a bank and indiscriminately shoot innocent bystanders. To kidnap an heiress in order to force distribution of food to the poor and then chicken out of a \$4 million opportunity.

The SLA sextet did not die nobly. They were on the lam, as we used to say, and brought the inevitable danger of a gunfight to a community of people they professed they wanted to help. Their adulators say they didn't have a chance. The adulators say nothing about

the victims of the SLAvers.

Idealism? Hardly. There is an immense amount of idealism in the young people of America, and in some ways it is more realistic than ever. To hold the infernal "idealism" of the SLA up to them as a guide and inspiration is almost as great a crime, perhaps greater, than any committed by the Symbidiotic Liberation

HEARING ON MILK PRICE SET JUNE 19

SACRAMENTO - Hearings to consider the reduction or suspension of minimum retail prices of milk in three Central California Milk Marketing areas have been announced by the California Department of Food and Agriculture, with Tulare-Kings Marketing area hearing set for June 19, 9:30 a.m. in the Visalia City hall.

Minimum wholesale prices for milk were suspended in the major population centers of these areas effective April 14. Recent changes in marketing conditions now make it necessary to consider reduction or suspension of minimum retail prices also, according to Department Director C.B. Christensen.

First of these hearings, for Zones 1 and 2 (the major portions of Fresno, Madera and Merced counties) of the Central Valley Marketing area, will be held on June 18, in Room 1036, 2550 Mariposa Street, Fresno.

A hearing for Zone 1 of the Kern County Marketing area will be held in the County Agricultural building, Bakersfield, on June 20. Zone 1 covers Western Kern county, including Bakersfield.

OUR TOWN

BY RUTH LOYD

BOB SHANNON has this habit, every morning, of gulping his vitamins down without looking in the little shot glass. This one morning, it took two glasses of water before the little pills went down. He noticed something sticking in his throat, but just kept swallowing until it went down. That evening, NELL asked him what he had done with her engagement ring. He denied knowing anything about the ring, and they looked everywhere. Then it dawned upon them. He had swallowed the ring with his vitamins. It took seventeen days, and lots of Phillips before the ring came through. Springville laid many bets as to when the ring would arrive. Everyone had a lovely time, except NELL. She had to do the diamond mining, and that kind of mining isn't all that great. BOB is now known as the million dollar man, and NELL doesn't want it to happen again. EVER!

BUM and ELLIE ROGERS divide their time between OUR TOWN and their farming property in Lost Hills. They spend the weekend here, and fly over to Lost Hills for the rest of the time. They have a big trailer at Lost Hills, and ELLIE thinks trailer living is great. BUM was telling me about the beautiful new plane BOB MERZOIAN has. A Twin Engine Beach, King-Aire turbo jet, with a pilot. BOB and MAC WILLIAMS took a little run over to Vegas to a wine tasting deal, with the Heublein company. The trip took one hour and thirteen minutes, and after they had tasted wine all day, they flew home without the plane. I'm just kidding. They really used the

plane. MAC says flying in the jet is like flying while sitting in your livingroom. BOB and AGGIE are really enjoying it. Makes running up to the new winery in Santa Rosa a breeze.

Being a famous columnist, I was given a pass to the Moonlight Fly-In. We had never been to a Fly-In, and it was a new exciting experience. Pilots and their families were there from everywhere. Sleeping bags under the wings of planes, children running around eating weird things, mothers keeping track of all the gear, and the heat and the dust, OUR NEW GENERATION have so much knowledge and do so many interesting things. They go so fast, and their children know so much about a world that is passing me by. It was a shame that the two accidents marred the great record. I watched when the helicopter's engine flamed out, and the sick sound when it crashed to the ground. My heart finally got away from my throat when the pilot was taken from the plane, and seemed to be alive. It was a tragic thing to have happened, and it could have been so deadly. I hope the Army doesn't discontinue the exciting show the Helicopters put on. I don't even know what keeps a plane up in the air, and it makes me feel old. I can't drive a motorcycle or a plane, and it makes me mad. I can ride a wobbly bicycle with no speeds or hand brakes.

Happiness is the flying generation.

Farmers Operating From Position Of Strength Says Kenneth E. Frick

WASHINGTON - Expected increase in 1974 grain production, over 1973, will be more than double the amount of grain considered surplus following the 1971 crop," according to Kenneth E. Frick, administrator of the Agricultural Stabilization and Conservation service, Washington, D.C.

'This means our consumers, and the world's consumers, can be assured that their food production is in good hands with U.S. farmers," Frick said. "We have been successful in moving agriculture back to the market economy, and as a result. farmers are operating from a position of strength today."

Referring to recent pressure to build a reserve of grains and cotton, the U.S. Department of Agriculture official said, "For 40 years, the government has had a policy of either trying to work off surplus, or trying to build up one. I am hopeful that we can, for once, develop a policy that will let the food market forces operate independently without government interference.'

Frick said, "It's time for other industries to move back to

the price incentive system and away from government regulation and protection, as agriculture has done."

'Farm programs payments, which took more than 40 percent of the USDA budget a few years ago, may be down to less than 5 percent of our 1975 budget," Frick said. "Those who have been critical of agriculture's subsidies should look now to see if their own houses are in order. Agriculture has been doing its part."

He noted that the public has never liked paying farmers not to farm, the idling of land and government buying and storing of huge surpluses of farm commodities. "Today, we are no longer paying farmers not to grow crops. We are not asking farmers to idle land. We have emptied the bins of surplus commodities," Frick said.

'Farmers are increasing their productivity at twice the rate of industry. They have increased their net income 77 percent in five years. They have maintained their comparative advantage in world markets, and farm exports have quadrupled in the past five

and so are you

Back roads can often lead to better farm credit service. And when you specialize in serving agriculture you see a lot of them. At PCA, providing the best in constructive, short-term financing for farmers and ranchers means getting close to where the work is. The better we know you, the more we can help. Your place, or ours? Give us a call and let's get together.
